*Measure at the widest point of the shoulder.*
10. Forearm circumference.....cm  
*Measure at the widest point of the forearm.*
11. Wrist circumference.....cm  
*Measure at the point of the wrist bone.*

Measurements should be taken using a centimeter tape in such a way that the tape easily adheres to the body. Read the measurement where the end of the tape meets the other part of the tape. Check whether the measurement has been taken on the right side of the tape, meaning the increasing numbers. Enter the measurement under the relevant number in the table.
